### **Functional Responsibilities**

The Senior Engineering Technician for Test Operations Support is responsible for establishing the Project and equipment baseline. They will verify the procedures required to perform a successful System Operational Test (SOT) with Government representatives.

### **Description of Duties**

The Senior Engineering Technician for Test Operations Support will be responsible for the identification, analysis and evaluation of risks and continual monitoring throughout the project. More detailed responsibilities are:

- Coordinates Test Support Technicians
  - Operation of consoles / equipment
  - Dry-running and validation of test procedures
  - Supporting missions and test events
- Analysis of post-test operations
- Preparing all test documentation.

- Technical communications, systems schematics, and other information to design and implement system configurations required for various tests
- Preparing test scenarios
- Data collection, data analysis and documenting the configuration of items under test
- Preparing Quicklook Reports and Final Reports
- Complete actions as assigned to mitigate identified risks

**Minimum Education and Experience:**

- Bachelor of Science Degree in an Engineering Discipline and 10+ years of related experience or MS with 8+ years of related experience
- Additional direct work experience of 6 years may be a substitute for a Bachelor of Science Degree in Engineering
- Skilled in test software/hardware development design, implementation, and integration
- Skilled in Design for Test (DFT) paradigms
- Experienced working on a cross discipline team
- Possess good communication skills including interpersonal communication and team communication
- Takes initiative and has a closure-oriented nature
- Ability to lead Test Engineers while successfully collaborating with, and influencing other managers or engineers from other disciplines
- Motivated, team-oriented individual with strong problem-solving abilities

**Required Skills and Certifications:**

- DoD Secret Clearance or ability to obtain an Interim Secret Clearance within 90 days of signing the contingent hire offer letter
- As a condition of continued employment, you must maintain an active security clearance

**Other required skills/experience:**

- Your resume/cv accepted by our customer
- Proficient in MS Office Word, Outlook, Excel, Access, and Power Point
- Strong attention to detail with organizational and problem-solving skills
- Ability to interface constructively with US Government and Industry teammates
- Excellent written, verbal, and interpersonal communication skills
- Ability to work independently and pro-actively in providing high quality services
